SIEMENS

Compact actuating room automation stations, BACnet/IP, AC 24 V (Actuating DXR)

DXR1.E10PL-112, DXR1.E10PL-113

Combination of room automation station and actuator for buildings with increasing demand on functionality and flexibility in Room Automation, VAV and FPB applications.

- Compact, configurable room automation station in combination with actuator for HVAC
- QMX2.. and QMX3.. room units
- BACnet IP communications (BTL certified)
- 2-port Ethernet switch
- USB interface
- KNX PL-Link bus to connect sensors, actuators, and operator units (including bus power)
- Operating voltage AC 24 V
- Built-in 10 Nm actuator
- Internal 0…500 Pa differential pressure sensor
- Plug-in terminal blocks

Configurable

The DXR1.. automation stations provide the infrastructure for systems and application-specific functions which can be configured.

Compact series

The compact build allows direct mounting on the damper shaft. It is designed for VAV and FPB.

Plug-in terminal blocks

Plug-in terminal blocks for easy exchange of room automation stations.

Integrated actuator

The actuator gear base is integrated into the housing of the actuating DXR. It supports dampers with up to 10 Nm torque.

Desigo Room Automation offers the highest level of flexibility for energy-optimized solutions while satisfying requirements for temperature control, ventilation and comfort using standard tools and established workflows.

Preinstalled application types

● Variable (VAV), Fan Powered Box (FPB) and constant air volume flow
  – With staged and modulating electric heating
  – With modulating hot water / chilled water with room or supply air temperature control
● Radiant ceiling: cooling, cooling and heating (2-pipe), or cooling / heating (4-pipe), heating
● Radiator: hot water, electric stepped or modulated controlled

Application options

● Separate temperature and air volume flow setpoints for all 4 operating modes
● Separate minimum and maximum cooling and heating flow setpoints
● Single-stage, multiple-stage or variable fan control (FPB / DXR1.E10PL-113)
● Chilled water and hot water valve
● Extract air volume flow control

The selected application and its parameters as well as input and output configuration determine the room automation station's functionality.
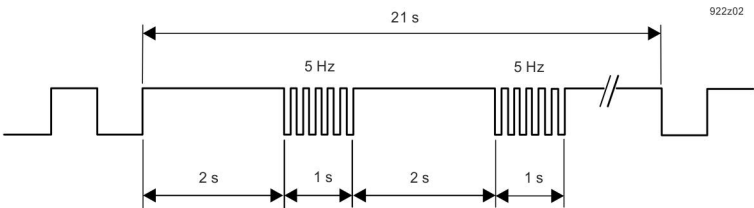

A detailed description of functionality is available in the ABT (Automation Building Tool) online help.

Communication

● 2-port Ethernet switch for cost-effective cabling via line topology

  Note: DXR1 supports cabling based on daisy chain topology. The max. number is 20 devices and in the event of a failed automation station, all other stations are no longer reachable. DXR1 can be cabled as ring topology if higher reliability is required. This requires support for layer 2 switches RSTP (Rapid Spanning Tree Protocol) as well as SNMP monitoring and that any loss of superposed system is reported. In the event of a fault, switching the communication paths can take between 10 and 30 seconds. DXR1 routes the RSTP protocol for the switches. It does not actually process the RSTP protocol. Further information can be found in Application Guide for BACnet Networks in Building Automation (A6V11159798).

● USB connection for service, commissioning and firmware download
● KNX PL-Link communication with room operator units, sensors and actuators

LED indication

LED	Color	Activity	Function
Run	Green	Steady ON	Device is ready for operation
		Steady OFF	Device is not powered
		Regular flashing	Start-up or the program is stopped
	Red	Steady OFF	OK
		Steady ON	Program error Communications error (KNX PL-Link) Hardware fault
		Rapid flashing	Wrong or corrupt software No application loaded
		Blinking per wink command	Physical device identification

Service button (SVC)

Physical identification on the network.

Technical / Mechanical design
1	Service button (SVC) for sending device identification	2	2 UIs (universal input), 1 AO (analog output), 1 DI (digital input)
3	Power supply	4	KNX interface
5	4 DOs (digital Triac output)	6	Status information LED (bi-color)
7	2-port Ethernet switch		

Housing

The housing consists essentially of flame retardant, non-brominated plastic.

Product No.	Stock No.	Inputs	Outputs	Description	Quantity
DXR1.E10PL-112	S55499-D458	2 universal inputs, 1 digital input	4 digital outputs, 1 analog output	VAV application	Single package / multiple package (10)
DXR1.E10PL-113	S55499-D459	2 universal inputs, 1 digital input	4 digital outputs, 1 analog output	FPB application	Single package / multiple package (10)

Ordering

When ordering, indicate product number, stock number and description.

Notes

Security

| ⚠	**⚠ CAUTION**
	National safety regulations
	Failure to comply with national safety regulations may result in personal injury and property damage.
	● Observe national provisions and comply with the appropriate safety regulations.
	● Use only properly trained technicians for mounting, commissioning and servicing.

Engineering

Identification
Each device has a unique serial number to ensure efficient commissioning. It is provided on the adhesive barcode reader. The serial number can be read directly into the engineering tool using a barcode reader.

Wiring
Wiring must be sufficiently insulated to the available rated voltage. Sizing and fusing of the wiring depend on the connected load.

Mounting

The automation station is mounted directly on a damper shaft.
See the mounting instructions (document ID: A6V11393918) for detailed information.

Differential pressure sensor

- Avoid bends and pressure when attaching the tube.
- Connect the "+" connection on the side with the higher pressure and the "-" connection on the side with the lower pressure.
- Connection tubes (interior diameter) of 4 mm.
  Air tube connection kit DXA.T50 for connection of tubes with 6.5 mm (interior diameter).
- The maximum tube length is 2 m.

Installation

Applies to devices with supply output (AC 24 V or mains voltage) such as Triac output or output to supply a field device.

⚡	⚠ **WARNING**
	No internal line protection for supply lines to external consumers
	Risk of fire and injury due to short-circuits
	• Adapt the line diameters as per local regulations to the rated value of the installed fuse.

Maintenance

The automation station is maintenance-free.

Disposal

	The device is considered an electronic device for disposal in accordance with the European Guidelines and may not be disposed of as domestic garbage.
	● Dispose of the device through channels provided for this purpose.
	● Comply with all local and currently applicable laws and regulations.

Warranty

Technical data on specific applications are valid only together with Siemens products listed under "Equipment combinations". Siemens rejects any and all warranties in the event that third-party products are used.

Power data

Power supply	A6V11393933_en--_c
Operating voltage (SELV/PELV)	AC 24 V +/-20 %
Frequency	50 or 60 Hz
Power consumption	12 VA max.

Transformer requirements and recommended voltages	
Type	Class 2, AC 24 V, 50 / 60 Hz, SELV, PELV

Functional data

Functional data	
Nominal torque	10 Nm
Nominal rotary angle	90°
Maximum rotary angle	95° ± 2°
Runtime for 90° rotary angle	150 s
Shaft size	8…16 mm, round 8…10 mm, round (with centering insert) 6…12.8 mm square
Minimum shaft length	20 mm

Universal inputs

Analog inputs: DC 0…10 V	
Operating range	0…10 V
Resolution	10 mV

Analog inputs: sensors			
Type	Measuring range	Accuracy	Resolution
LG / DIN-Ni 1000	0…50 ℃	+/- 0.5 K at 25 ℃	0.1 K at 25 ℃
Pt1K, 375 / 385			
NTC10K / NTC100K			

Digital inputs	
0/1 digital signal (binary)	For potential-free contacts
Sampling voltage/current	DC 15 V, 7 mA
Contact resistance	Max. 200 Ω (closed) Min. 50 kΩ (open)
Delay	10 ms
Pulse frequency	Max. 20 Hz

Outputs

Analog output

Analog output	
Control range	0…10 V
Resolution	5 mV
Output current	Max. 1 mA

Triac outputs	
Number of channels	4
Type	Requires AC 24 V source to allow switching: switching to phase (AC 24 V) or neutral (⊥)
Current rating	0.5 A max. per channel
Voltage rating	AC 24 V +/-20 %
Max. load	12 VA per channel

Pressure sensor

Pressure sensor	
Measurement range	0…500 Pa
Sample rate	≤ 500 ms
Overload range	0…100 kPa
Measuring range accuracy	3 %
Zero point accuracy	0.2 Pa
Resolution	12 Bit

Connections

Interfaces	
Ethernet	Plugs: dual RJ45, 10M/100M fast Ethernet Interface type: IEEE 802.3 compliance Cable type: 100 M STP CAT 5
USB (2.0)	Type Micro B
KNX PL-Link	Terminal: 5.08 mm, 2 pin DPSU: 50 mA, non-standard DPSU

KNX PL-Link: Consider maximum bus load and different device types (two devices of the same type are not supported).

Wiring connections	
Wiring lengths for signals	KNX PL-Link: max. 80 m with internal bus power Signal lines: max. 80 m For analog inputs: max. 30 m

Conformity

Ambient conditions and protection classification	
Classification per IEC/EN 60730 Function of automatic control devices Pollution degree Overvoltage category	Type 1 2 III
Design type	Device suited for use with equipment of safety classes I and II
Degree of protection of housing to IEC EN 60529 Room automation station	IP20
Climatic ambient conditions Transport (packaged for transport) as per IEC EN 60721-3-2	Class 2K3 Temperature -25...70 °C Air humidity 5...95 % (non-condensing)
Operation as per IEC/EN 60721-3-3	Class 3K5 Temperature -5...50 °C Air humidity 5...95 % (non-condensing)
Mechanical ambient conditions Transport as per IEC/EN 60721-3-2 Operation as per IEC/EN 60721-3-3	Class 2M2 Class 3M2

Standards, directives and approvals	
Product standard	IEC/EN 60730-1 Automatic electronic controls for household and similar use
EU conformity (CE)	A6V11791489
RCM conformity	A6V11791498
EAC conformity	Eurasian conformity
UL Approbation Federal Communications Commission	UL as per UL916, http://ul.com/database cUL as per CSA – C22.2 No. 205 FCC CFR 47 Part 15 Class B
ICES003	CAN ICES-3 (B)/NMB-3(B)
Environmental compatibility	The product environmental declaration (A6V11805930*) contains data on environmentally compatible product design and assessments (RoHS compliance, materials composition, packaging, environmental benefit, disposal).

FCC regulations

Modification of this device to receive cellular radio telephone service signals is prohibited under FCC rules and federal law.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
General

General information	
Color	Light gray
