

SQM5 rear side, design without a second drive shaft end

SQM5 rear side, design with 2 drive shaft ends

## Actuators for Air and Gas Dampers

with electronic modules

- Electromotive actuator with up to $\mathbf{4 0} \mathbf{N m}$ torque
- Clockwise and counterclockwise variants
- Running times from 10 to 90 seconds
- Different shaft designs available
- With 1 or 2 drive shaft ends, drive shafts interchangeable or available separately
- Can be equipped with electronic modules for control and position feedback signal via steady signals
- Internal and external position indication
- Drive shaft and camshaft can be disengaged separately
- Variants with UL certification

The SQM5... and this Data Sheet are intended for use by OEMs which integrate the SQM5... in their products!

The SQM5 actuators are designed to drive air and gas dampers. Areas of application are oil and gas burners of medium to larger capacity.

The actuators are used primarily for the load-dependent control of the gas flow, oil volume and combustion air volume:

- In connection with 3-position or modulating controllers (e.g. $4 \ldots .20 \mathrm{~mA}$ ), and/or
- Directly by burner controls

## Supplementary documentation

| Product type | Type of documentation | Documentation number |
| :--- | :--- | :--- |
| ASZ | Data sheet | N7921 |
| AGA56 | Data sheet | N7922 |

## Warning notes

To avoid injury to persons, damage to property or the environment, the following warning notes must be observed!

Only qualified staff may open, interfere with or modify the actuators!

- Read the documentation on the actuators carefully and fully. If not observed, dangerous situations can occur
- The user must ensure that the actuators meet the requirements of the relevant application standards
- All product-related activities (mounting, settings and maintenance) must be performed by qualified and authorized personnel

## Caution!

- Risk of electric shock - to disconnect the equipment from the power, it may be necessary to open more than one switch. Before performing maintenance work, the equipment must be disconnected from the power supply
- The electrical connection between the conduit fittings is not made automatically. It must be established on the installation site
- The connecting plate is made of plastic and does not provide earthing of the conduit fittings. Earthing must be ensured by adequate washers and wire links
- All cam switch settings must satisfy the requirements of the relevant application standards
- To ensure protection against electric shock, the connection terminals must have adequate protection. Make certain that non-insulated connections or wires cannot be touched
- Each time work has been carried out (mounting, installation, service work, etc.), check to ensure that wiring is in an orderly state
- Fall or shock can adversely affect the safety functions. Such actuators must not be put into operation even if they do not exhibit any damage
- Static charges must be avoided since they can damage the electronic components on contact.
Recommendation: Use ESD equipment

## Notes on use in North America

- Only flexible conduits with relevant accessories may be used
- Only copper conductors may be used
- All Class 2 circuits must be wired with CL3, CL3R, CL3P or equivalent cables OR
All circuits are wired according to Class 1 (electric light or power circuits)
- Ensure that the relevant national safety regulations are complied with
- In the geographical areas where DIN regulations are in use, the requirements of VDE must be complied with, especially DIN/VDE 0100, 0550 and DIN/VDE 0722
- Make certain that the actuator is not exposed to direct solar radiation
- Tightening torques
- Cover screws: 3.5 Nm
- Connecting cover: 2 Nm
- Ensure that the electrical wiring is in compliance with national and local regulations
- Make certain that strain relief of the connected cables is in compliance with the relevant standards
(e.g. in accordance with DIN EN 60730 and DIN EN 60335)
- Ensure that spliced wires cannot come into contact with neighboring terminals. Use suitable ferrules
- SQM5 terminals that are not used must be protected by dummy plugs
- When wiring the unit, separation between the 120 V AC or 230 V AC range and the other voltage ranges must be maintained in order to ensure protection against electric shock
- The connection between the actuator drive shaft and the relevant controlling element must be form-fitted
- Only plastic versions of cable glands may be used

Applied directives:

- Low-voltage directive
- Electromagnetic compatibility EMC (immunity)

2014/30/EC

Compliance with the regulations of the applied directives is verified by the adherence to the following standards / regulations:

- Automatic electrical controls for household and similar use DIN EN 60730-1 Part 1: General requirements
- Automatic electrical controls for household and similar use DIN EN 60730-2-14 Part 2-14: Particular requirements for electric actuators

## The relevant valid edition of the standards can be found in the declaration of

 conformity!EAC Conformity mark (Eurasian Conformity mark)

For use in the U.S. / Canada, the actuators carry type suffix «R» (see example) and are (14) UL- and © CSA-listed.

Example: SQM50.480R1

## Lifetime

The actuator has a designed lifetime* of 250,000 burner startup cycles (OFF $\Rightarrow \mathrm{ON} \Rightarrow$ OFF) under load with the rated torque in the entire rotation angle range, which under normal operating conditions in heating mode corresponds to approx. 10 years of service (starting from the production date given on the nameplate). This is based on the endurance tests specified in the standard EN 298.
A summary of the conditions has been published by the European Control Manufacturers Association (Afecor) (www.afecor.org).

The lifetime is based on use of the actuator according to the manufacturer's data sheet. After reaching the designed lifetime in terms of the number of burner startup cycles, or after the corresponding usage time, the actuator must be replaced by authorized personnel.
*The designed lifetime is not the warranty time specified in the Terms of Delivery

Local and currently valid legislation must be observed.

Housing

Drive motor

Couplings

- Housing sections made of die-cast aluminum
- Covers made of impact-proof and heat-resistant plastic
- Synchronous motor
- Driven shaft and cam shaft can be adjusted via 2 separately couplers, independent of the gear train
- Shaft can be manually disengaged from the gear and motor by operating the coupling (coupling pin (Kx), refer to Technical data)
- Automatic reengagement
- Coupling pin (K1 and K2)
- Separation of gear and camshaft using coupling pin (K1)

- Separation of drive shaft and gear using coupling pin (K2)

Cam shaft drive

Adjustment of switching points

Position indication

- Backlash-free gearing
- Via rotating cams
- Scales adjacent to the cams indicate the angle of the switching point
- Internally:
- Scale at the end of the drive shaft
- Black scale for counterclockwise rotation, single arrow on the cam
- Red scale for clockwise rotation, double arrow on the cam
- Externally:
- Scale in viewing window

Electrical connections

Gear train

## Drive shaft

Actuator
fixing

- Blade terminal on micro switch
- Screw terminals for «N» and «PE»
- Subassembly and fixing of wiring by means of removable Pg plastic insert possible
- Easy introduction of cables through large openings in the housing
- Fixing of Pg insert with all cables by means of a screw
- Maintenance-free gearwheels and bearings
- Secured with a removable circlip
- Easily exchangeable
- With corresponding shaft both sides transmission possible
- Different shaft designs available
- Fixing holes on the front of the housing and at the bottom
- Front fixing also possible from inside the housing
- Variable mounting height through the use of an extra adapter

Actuators with premounted accessories are only available on request.

The actuators are

- also meet CE requirements
- are of the same basic design as the equivalent standard types

1) At 60 Hz frequency, running times are about $17 \%$ shorter
2) Based on 250,000 position changes
3) See drive shafts and torques depending on the voltage
4) Order drive shaft separately
5) For details, refer to Data Sheet N7922
6) For details, refer to Data Sheet N7921

Proportional controlling element with mounting plate VKP

- Proportional controlling element for mounting between threaded flanges in gas trains
- Refer to Data Sheet N7632.

Mounting plate ASK33.3
Article no.: BPZ:ASK33.3

- For mounting the SQM5 onto the VKP proportional controlling element using only the AGA58.5 drive shaft.
- Refer to Mounting Instruction M7646 (74 3190843 0)

Mounting kit ASK33.9
Article no.: BPZ:ASK33.9

- For mounting the SQM5 onto butterfly valve VKF41.xxxC using only the AGA58.1 drive shaft
- Refer to Mounting Instruction M7815.4 (4 3199535 0)

Pg insert AGA55.2
Article no.: BPZ:AGA55.2
Inclusive sealing and screw, for SQM5.

Kit for shaft seal AGA55.5
Article no.: BPZ:AGA55.5

- For sealing the shaft feed through and therewith for perfecting the degree of protection
- On both sides shaft seals for actuator SQM5
- Packed as kit together with O-rings inclusive mounting screws

- Refer to Mounting Instruction M7815.5 (74 3190577 0)

## Spacer AGA57.1

Article no.: BPZ:AGA57.1

- Adapter for SQM10 / SQM20
- Refer to Mounting Instruction M7815.1 (4 3199529 0)

Adapter for actuator ME8 AGA57.2
Article no.: BPZ:AGA57.2

Refer to Mounting Instruction M7815.2 (4 3199536 0).

Adapter for Honeywell Mod. III actuator AGA57.3
Article no.: BPZ:AGA57.3

Refer to Mounting Instruction M7815.2 (4 3199536 0).

## Electronic modules AGA56

- For control of the actuator
- Modular installable, complete with mounting frame and fixing screws

See for AGA56.1x Data Sheet N7922 and Mounting Instruction M7922.3 (4 3199602 0)
See for AGA56.4x Data Sheet N7922 and Mounting Instruction M7922.2 (4 3199542 0)
See for AGA56.9x Data Sheet N7922 and Mounting Instruction M7922.1 (4 319 9532 0)

## Potentiometers ASZ

- ASZxx.3x refer to Mounting Instruction M7921 (4 319 9604 0)
- ASZxx.7xx refer to Mounting Instruction M7806/M7808/M7812 (4 3192263 0)
- ASZxx.8xx refer to Mounting Instruction M7806/M7808/M7812 (4 3192263 0)
- ASZxx.9xx refer to Mounting Instruction M7806/M7808/M7812 (4 3192263 0)

Refer to Data Sheet N7921

Refer to Mounting Instruction M7815.3 (4 3199534 0).

| Kind of current | AC |
| :---: | :---: |
| Operating voltage and operating frequency | Refer to «Type summary» |
| Drive motor | Synchronous motor |
| Power consumption | 20 VA |
| Angular rotation | Between $0^{\circ}$ and max. $160^{\circ}$ (scale range) |
| Mounting position | Optional |
| Degree of protection | IP54 (provided knockout holes remain closed for mounting or are closed off, with adequate cable entries) |
| Safety class | I |
| External overload fuse | Max. 6.3 AT (slow), to DIN EN 60127-2/5 |
| Internal overload fuse | Max. 2 AT (slow), depending on the type |
| Cable entry | $4 \times \mathrm{Pg} 13.5$ with thread |
| Wire cross-sectional area of the connecting wires, including earth terminal (PE) | $0.5 \ldots 2.5 \mathrm{~mm}^{2}$ |
| Direction of rotation | Facing the gear train side: counterclockwise or clockwise (selectable), <br> delivery: counterclockwise |
| Torque | See the Torques diagram and Drive shafts accessories |
| Holding torque | Max. torque |
| Running time | 10...90 s (refer to «Type summary») ${ }^{1)}$ |
| Pause time at change in direction of rotation | > 100 ms |
| End and auxiliary switches <br> - Type <br> - Switching voltage <br> - Switching capacity | To DIN 41636 <br> AC $24 . . .250 \mathrm{~V}$ <br> To CEE 24 / VDE 0630 <br> 7.5 (3) A, AC 250 V |
| Number of end switches | 2 |
| Number of auxiliary switches | Max. 6, depending on the type |
| Drive shaft | Replaceable |
| Weight | Approx. 3.3 kg |
| Temperature of the mounting surface | Max. $60^{\circ} \mathrm{C}$ |
| Lifecycle | 250,000 start cycles (OFF $\Rightarrow$ ON $\Rightarrow$ OFF) under load with the rated torque in the entire rotation angle range. <br> 2,000,000 control cycles under load with $75 \%$ of rated torque in rotation angle range of $10^{\circ}$ |

1) Specifications apply to ambient temperatures of $23^{\circ} \mathrm{C}$ and a mains voltage of 120 VAC or 230 V AC and a mains frequency of 50 Hz . With a mains frequency of 60 Hz , the running times are approx. 20\% shorter.
Torques lower by the same rate.

| Storage | DIN EN 60721-3-1 |
| :--- | :--- |
| Climatic conditions | Class 1 K 2 |
| Mechanical conditions | Class 1 M 2 |
| Temperature range without integrated | $-50 \ldots+60^{\circ} \mathrm{C}$ |
| AGA56... |  |
| Humidity | <95 \% r.h. |
| Transport | Class 2 K 2 |
| Climatic conditions | Class 2 M 2 |
| Mechanical conditions | $-50 \ldots+60^{\circ} \mathrm{C}$ |
| Temperature range without integrated |  |
| AGA56... | <95 \% r.h. |
| Humidity | DIN EN $60721-3-3$ |
| Operation | Class 3 K 3 |
| Climatic conditions | Class 3 M 3 |
| Mechanical conditions | $-20 \ldots+60{ }^{\circ} \mathrm{C}$ |
| Temperature range without integrated |  |
| AGA56... | $<95 \%$ r.h. |
| Humidity | Max. $2,000 \mathrm{~m}$ above sea level |
| Installation altitude |  |

## Caution!

Condensation, formation of ice and ingress of water are not permitted! Failure to observe this poses a risk of damaging the safety functions and the risk of electric shock.

Conductive plastic potentiometer

Connection diagram

2*1000 $\Omega$ double potentiometer Maximum rotation angle, depending on the type

| Operating voltage | 10 V DC |
| :--- | :--- |
| Permissible hysteresis | $0.3 \%$ of $90^{\circ}$ or of $135^{\circ}$, depending on the <br> type |
| Total resistance tolerance | $\pm 20 \%$ |
| Effective rotation angle | $90^{\circ}$ or $135^{\circ}$ |
| Connection terminal strip | 3 -pole |
| For a wire cross-section of.. | $0.5 \ldots 1 \mathrm{~mm}^{2}$ |
| Wiper current rating | Max. $100 \mu \mathrm{~A}$ |
| Transfer resistance of the wiper contact | Max. Rü $\leq 100 \Omega$ |
| Linearity (based on Rges $=1000 \Omega$ ) | $\pm 1 \%$ |
| Sleekness (alpha $=10^{\circ}$ ) $/$ microlinearity | $<0.5 \%$ |
| Lifetime | Approx. 2 million actuation cycles |

Apply operating voltage to «a» and «c».
Conductive plastic potentiometers can be destroyed if operating voltage is applied between «a $\rightarrow \mathbf{b}$ » or «b $\rightarrow \mathbf{c}$ ».

SQM53 / SQM54

SQM56

Legend

1) At 60 Hz frequency, running times are about $17 \%$ shorter and torques are proportionally lower

## Note!

Each drive side is capable of delivering the maximum torque, but the total torque of both sides must not exceed the maximum permissible torque of actuator.

With appropriate running time for $90^{\circ} / 130^{\circ}$ :
_- Torque in continuous operation
------- $\quad$ Release or starting torque $=$ short-time torque
Maxn Max. permissible torque in continuous operation for all running times
Maxb Max. permissible release or starting torque for all running times

Diagram shows the maximum number of switches (2 end and 6 auxiliary switches).
On versions with fewer than 6 auxiliary switches, the higher numbers are not used. For example, the actuator version with 2 end and 2 auxiliary switches does not use switches V, VI, VII and VIII.

By exchanging the 2 motor connecting cables, the actuator's direction of rotation can be changed from counterclockwise to clockwise.

Counterclockwise rotation

Clockwise rotation

## Note!

When changing the direction of rotation from counterclockwise to clockwise, the cams must be readjusted.

Clockwise rotation:
Red scales on the cam shaft, double arrow on the cams.

Counterclockwise rotation:
Black scales on the cam shaft, single arrow on the cams.

## Note!

Ensure correct direction of rotation!
Delivery state: Counterclockwise
